

DSA By Kunal Kushwaha

Git & Github

cd → command prompt directory
 dir → To list
 type nul > example.txt → to create file

git add.

git commit -m "message"

to add something in example.txt.

↳ echo content > example.txt

to display

type example.txt

to delete.

delete example.txt

contributing in other repo

→ get branch kunal

→ get checkout kunal → (Head will now on kunal)

→ git add.

→ git commit -m "kunal added a message"

→ git log (to check)

→ git push origin kunal.

To remove the commit or change

- git log (copy the one below it)
- git status
- git reset (copied item)
- git status (will be in red)
- git add.
- git stash
- Done
- git push origin cold2 -f.

How to update your forked branch main as the same as from which you have forked

- git checkout main
- ① → git fetch --all --prune
- ② → git reset --hard upstream/main
- 3 → git push origin main.

or

→ git pull upstream main ^{branch}
